Unlock email

IT STARTS WITH AN EMAIL

Make sure it's seen by only the right people.

Maillock® is the friendliest cybersecurity solution on the planet, providing an encrypted and authenticated network that secures the personal data you send over email

2-FACTOR AUTHENTICATION

Two challenge flows – limit access to the right people.

SMS

Send a one-time code to your recipient's mobile phone or tablet.

Q&A

Ask your recipient a question with an answer only they could know.

IDENTITY SECURE

Digital Recorded Delivery

Maillock is the secure email solution you can trust, sending confidential messages and attachments with a layer of military-grade encryption and multi-factor authentication. With Maillock's full audit trail, you can keep track of every interaction with your message, including recipient opens, file downloads, and revoke status.

Compose

Read and write using your usual email client. Add into Outlook, use on the web, or deploy to your server.

Challenge

Make sure only the right people can open your emails - set 2-factor challenges to authenticate recipients.

Encrypt

Send emails and attachments with end-to-end AES-256 encryption. Not even we could read them if we tried.

Trace

Trace every message. Know when your emails get read and follow up with recipients at the right time.

Revoke

Recall an email any time after you've sent it, even if it's been read - your recipient will lose retrieval access.

Engage

Empower your customers with a secure email thread directly to your business. Recipients reply for free.

TESTIMONIAL

"Maillock has improved our company in respect of data security. It's helped us to ensure that clients know that we're taking their data security seriously. A lot of the things that we do are very process-driven, so this has just slotted in seamlessly to the way we do our business every day."

Deb Owen, Administration Manager at Rapport Financial Strategists

WHY USE MAILOCK? MAILOCK HELPS YOU...

Know your customer

Digitise friction-inducing KYC, anti-money laundering, and ID verification processes.

Strengthen your brand

Add company logos to secure emails. Show your business as a leader in data protection.

Cut postage budgets

The financial services alone could save up to £1.3bn by reducing its paper output.

Reduce data risk

Emails sent to the wrong person are the #1 cause of data exposure. Prevent misfires.

TAKE A LOOK AT WHAT MAILOCK HAS TO OFFER

- Unlimited secure emails to all subscribed users, with recipients having the ability to read, attach and reply for free.
- Offers your chosen account administrator access to the admin portal, where they can set up and manage subscriptions, company branding and shared email addresses.
- Provides read notifications to both senders and repliers, allowing you to know when your email has been opened and follow up at the right time.
- A choice between SMS and Q&A authentication.
- 365-day message persistence.
- Email revoke that allows you to recall any email sent securely.
- Utilise the Maillock Secure Community and 'Read without email verification' option to allow a lower level of security checks for familiar clients.
- Outlook Add-in (OAI), which allows you to:
 - Compose and reply to emails directly within Microsoft Outlook.
 - Utilise trigger words within the subject line or body of your message to receive a prompt to send securely.
 - Auto-decrypt secure emails by double-clicking.

DEPLOY INTEGRATIONS

Web: Compose, read, and reply from within our secure Maillock portal.

Outlook: Integrate Maillock directly with your workflow, with our Outlook add-in for Windows.

Gateway: Deploy Maillock as a secure encryption gateway on-premise or in the cloud.

WHY MAILOCK? SECURE EMAIL HELPS BUSINESSES...

Meet ESG Goals

Companies with a strong environmental, social, and governance proposition achieve higher equity returns and reductions in bottom-line risk.

Save logistics costs

The financial services industry alone could save up to £1.3bn by reducing its paper output, as well as providing "huge environmental benefits."

Reduce data risk

Emails sent to the wrong person are the #1 cause of data exposure. Don't let colleagues or clients lose sleep over inadvertent data loss.
