

TRUST OUR TECHNOLOGY EXPERTS TO DELIVER

The Technical Centre of Excellence is here to guide you.

Whether you need technical enablement for new cloud technology or have complex technical queries outside our usual support scope, Westcoast Cloud's Technical Centre of Excellence (TCoE) is here to provide the expert assistance necessary to reach your business objectives.

WHAT DO WE DO?

As your trusted technology advisors, we are dedicated to guiding you through the intricacies of the modern Microsoft technology landscape and other vendors available from Westcoast Cloud.

We can help you with the following:

1 Technology enablement through demonstrations, as well as virtual and in-person workshops

“Really good training session and discussion around Azure Open AI, ChatGPT. Was very informative and cleared up some grey areas around the platform. Also served as perfect preparation for the forthcoming customer call.”

- WESTCOAST CLOUD PARTNER

2 Technology advisory through best practice guidance, assessments, and optimisations

“The Technical Centre of Excellence demonstrated a thorough knowledge of our requirements and the potential of the platform being recommended.”

- WESTCOAST CLOUD PARTNER

BEST OF ALL

Our TCoE literally wrote the book on Azure – one of our team has published certification exam guides for Azure Fundamentals, Azure AI Fundamentals, and Azure Data Fundamentals, as well as other titles on Azure security and hybrid Cloud infrastructure to name a few.

In addition, the TCoE has provided technical reviews and ratification for other published authors' content.

Finally, at Westcoast Cloud, we are dedicated to continually expanding our knowledge and expertise. The team are participants in the exclusive, invite-only Microsoft enablement events such as 'CSP Masters' and 'train-the-trainer' workshop activities, ensuring that you benefit from the latest knowledge and skills.

WHY GET IN TOUCH?

You may already know our slogan: 'When it comes to Cloud, we've got you covered.' At our Technical Centre of Excellence (TCoE), we have a team of experts who specialise in everything cloud-related.

The Westcoast Cloud experts are certified in all Microsoft cloud solutions—Modern Workplace, Security, and Azure—and they are recognized as Microsoft MVPs in Azure and Cloud Security.

They also hold MCT (Microsoft Certified Trainer) status and actively contribute to Microsoft Customer Connection Programs. This means they're not only highly qualified but also deeply involved in helping the Microsoft technology community.

WE'RE JUST AN EMAIL AWAY
